Summary

MCA (2026) student with strong foundation in Java, Data Structures, and Database Management Systems. Hands-on experience in building REST APIs using Spring Boot and working with MySQL. Familiar with software development, lifecycle and version control. Seeking an entry-level Software Engineer role to contribute to scalable enterprise applications.

Work Experience

Data Science Intern — SkillFied Mentor (July 2025 – August 2025)

- Completed a one-month internship focused on applied data science techniques.
- Worked on the following projects:
 - Temperature Prediction — Built a predictive model to estimate temperature trends using historical data.
 - Fraudulent Credit Card Transactions Recognition — Implemented a classification model to detect anomalies in financial transaction datasets.
- Enhanced skills in data preprocessing, model training, and evaluation.
- Demonstrated dedication, consistency, and problem-solving skills in real-world projects. Fast API microservice for ML model inference, containerized with Docker — gaining direct exposure to service decomposition and API contract design applicable to Spring Boot microservice patterns.
- Trained motion-classification models (Python, Scikit-learn) achieving 82% accuracy; automated preprocessing pipelines improving performance by 15% and cut iteration cycles by ~25% via structured evaluation frameworks.
- Collaborated with cross-functional teams to define ML requirements, evaluation metrics, and ship model improvements to staging — owning end-to-end delivery from problem definition to production.

Technical Skills

- Languages:** Java, Python, JavaScript
- Frameworks & Libraries:** Spring Boot, Spring Security, Spring Data JPA
- APIs & Architecture:** RESTful APIs, Microservices
- Databases & Caching:** MySQL, MongoDB, Redis
- DevOps/Cloud:** Docker, GitHub Actions, Basic Azure
- Tools:** Git, GitHub, IntelliJ, VS Code, Maven, Postman
- Frontend:** React.js
- Testing:** JUnit, Mockito

Projects

Where Is My Bus – Role-Based Bus Tracking System | GitHub (Spring Boot, MySQL, JSP, REST APIs, Leaflet.js)

- Developed a **role-based web application** with three modules: Agent, User, and Admin.
- Implemented **CRUD operations** for managing buses, routes, and stops in the system.
- Built **RESTful APIs** for handling bus data, user requests, and real-time updates.
- Designed and maintained a **MySQL database schema** for efficient data storage and retrieval.
- Created backend logic using **Spring Boot** to process requests and manage application flow.
- Integrated **Leaflet.js** for displaying bus locations on maps.
- Tested APIs using **Postman** to ensure correct functionality.
- Deployed frontend modules on **Vercel** for user access.

Education

Master of Computer Applications (MCA)	2024-2026
Uttarakhand technical university	
B.N College, Patna University, Patna	2021-2024
Bachelor of Computer Application (8.71 CGPA)	

Certifications & Achievements

- Java, DSA and System Design:** Intensive training in Java, data structures, and designing scalable systems.
- Java Training – IIT Bombay (Score: 97.50%)**
- SQL and Relational Databases 101 – Cognitive Class**
